Applicant: Chu et al.

Confirmation No.: Unknown

Serial No.: Unknown

Group Art Unit: Unknown

Filed: Herewith

Examiner: Unknown

Title: METHOD, SYSTEM AND PROGRAM PRODUCT FOR AUTOMATICALLY
CHECKING COOLANT LOOPS OF A COOLING SYSTEM FOR A
COMPUTING ENVIRONMENT

To: Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

STATEMENT OF RELEVANCE FOR INFORMATION
DISCLOSED BY APPLICANT

Sir:

The following Statement of Relevance is submitted with the accompanying Information
Disclosure Citation form.

Document
Designation

Relevance

BA	Equipment for detecting and shutting off leakage of water and method of detecting leakage of water wherein control valves are provided on the inflow and outflow sides of pipings for cold and hot water provided for air conditioners. A pressure drop in water leakage measuring sections is detected and occurrence of a leak of water is determined on the basis of the detection.
BB	Method of detecting water leakage of hot water heating system wherein a pressure sensor detects the water pressure within a circulation path for hot water. If water leakage occurs within the circulation path, the detection value of the pressure sensor drops with the passage of time, and based on the change on standing of the detection value of the pressure sensor, the existence of the water leakage within the circulation path is determined.
BC	Method of detecting leakage of hot water supply system wherein pressure of a water level sensor is measured and when falls below a specified value the controller judges that a leakage is occurring in the circulation path.

POU920030164US1

- 1 -

- BD Water level sensor device which detects water level in a bath tank, etc., and a leak of a piping by detecting a leak of the piping and the water level in a low pressure bath tank, through a corrector circuit, using a high pressure type pressure sensor.
- BE Electric pot for detecting the falling and water leakage of the electric pot according to a change in pressure that is detected by a pressure sensor for detecting pressure according to a liquid level in the container of the electric pot.

Full text copies of the art cited, or the pertinent portions thereof, are enclosed. It is respectfully requested that this art be considered by the Examiner in the above-entitled application and made of record therein. The information provided and references enclosed herewith shall not be construed as a representation that a search has been made or that no other art than that identified exists.

Respectfully submitted,

December 01, 2003
